Findings from the GLSEN 2017 National School Climate Survey demonstrate that Connecticut schools were not safe for most lesbian, gay, bisexual, transgender, and queer (LGBTQ) secondary school students. In addition, many LGBTQ students in Connecticut did not have access to important school resources, such as an LGBTQ-inclusive curriculum, and were not protected by supportive and inclusive school policies.

**FACT:** The vast majority of LGBTQ students in Connecticut regularly (sometimes, often, or frequently) heard anti-LGBTQ remarks (Fig. 1). Some also regularly heard school staff make homophobic remarks (13%) and negative remarks about someone’s gender expression (37%).

**FACT:** Most LGBTQ students in Connecticut experienced anti-LGBTQ victimization at school (Fig. 2). They also experienced victimization at school based on disability (27%), race/ethnicity (18%), and religion (18%). Most never reported the incident to school staff (51%). Only 29% of students who reported incidents said it resulted in effective staff intervention.

**FACT:** Many LGBTQ students in Connecticut reported discriminatory policies or practices at their school (Fig. 3). Over one-half (52%) experienced at least one form of anti-LGBTQ discrimination at school during the past year.

- In Connecticut, more than 1 in 4 LGBTQ students (27%) and approximately 3 in 5 transgender students (58%) were prevented from using their chosen name or pronouns in school. Additionally, more than 1 in 4 LGBTQ students (26%) and nearly 3 in 5 transgender students (59%) were unable to use the school restroom aligned with their gender.
- Nearly 1 in 5 LGBTQ students (18%) in Connecticut were disciplined for public displays of affection (PDA) that did not result in similar action for non-LGBTQ students.
- Some LGBTQ students in Connecticut experienced other forms of school discrimination (not in Fig. 3): being unable to discuss LGBTQ issues in assignments (9%), being unable to wear LGBTQ-supportive apparel (7%), being unable to include LGBTQ themes in extracurricular activities (7%), being unable to bring a same gender date to a school dance (6%), and being disciplined at school for identifying as LGBTQ (4%).
FACT: Many LGBTQ students in Connecticut did not have access to in-school resources and supports (Fig. 4).

- Fewer than 1 in 4 (23%) attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression. Fewer than 1 in 5 (16%) had a policy or official guidelines to support transgender or gender nonconforming (trans/GNC) students.
- Nearly all (99%) could identify at least one school staff member supportive of LGBTQ students (not in Fig. 4), but fewer (81%) could identify 6 or more supportive school staff.
- Only a quarter (25%) were taught positive representations of LGBTQ people, history, or events (“inclusive curriculum”). Fewer than a tenth (9%) reported receiving LGBTQ-inclusive sex education at school (not in Fig. 4).

RECOMMENDATIONS

School-based supports such as supportive and inclusive school policies, school personnel who are supportive of LGBTQ students, GSAs, and LGBTQ-inclusive curricular resources can positively affect school climate for LGBTQ students. Findings from the 2017 National School Climate Survey demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBTQ students in Connecticut who experience harassment at school and the limited access to some of the key resources and supports that can have a positive effect on their school experiences, it is critical that Connecticut school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement supportive and inclusive school policies, such as comprehensive anti-bullying/harassment and supportive transgender and gender nonconforming student policies;
- Support GSAs;
- Provide professional development for school staff on LGBTQ student issues; and
- Increase student access to LGBTQ-inclusive curricular resources.

These actions can move us toward a future in which all students in Connecticut will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

ABOUT THE RESEARCH In 2017, GLSEN conducted the tenth National School Climate Survey, a biennial survey of the experiences of LGBTQ youth in U.S. secondary schools. The national sample consisted of 23,001 LGBTQ students from all 50 states, the District of Columbia, and all 5 major U.S. territories. A total of 284 respondents were attending schools in Connecticut. The Connecticut sample was majority White (78%), 8% Hispanic/Latinx, 5% Multiracial, 4% Arab/Middle Eastern, 3% Asian/South Asian/Pacific Islander, 2% Black/African American, and < 1% Native American. The gender composition was 49% cisgender, 32% transgender, 12% genderqueer, and 8% another gender (e.g. questioning, genderfluid). Most (85%) attended public schools. The school community makeup was 46% rural/small town, 42% suburban, and 12% urban. The results reported for Connecticut had a margin of error of +/- 6%.
