

2013 STATE SNAPSHOT

Findings from the GLSEN 2013 National School Climate Survey demonstrate that Georgia schools were not safe for most lesbian, gay, bisexual, and transgender (LGBT) secondary school students. In addition, many LGBT students in Georgia did not have access to important school resources, such as Gay-Straight Alliances or similar student clubs, and were not protected by comprehensive anti-bullying/harassment school policies.

FACT: The vast majority of LGBT students in Georgia regularly heard anti-LGBT remarks.

- Nearly all heard “gay” used in a negative way (e.g., “that’s so gay”) and 9 in 10 heard other homophobic remarks (e.g., “fag” or “dyke”) at school regularly (i.e., sometimes, often, or frequently; see Figure 1).
- Nearly 8 in 10 regularly heard other students in their school make negative remarks about how someone expressed their gender, such as comments about someone not acting “feminine” or “masculine” enough (see Figure 1).
- 6 in 10 regularly heard negative remarks about transgender people (see Figure 1).
- Students also heard anti-LGBT language from school staff. 27% regularly heard staff make negative remarks about someone’s gender expression, and 19% regularly heard school staff make homophobic remarks.

Figure 1. Hearing Anti-LGBT Remarks from Students in Georgia Schools

FACT: Most LGBT students in Georgia had been victimized at school. The majority of these incidents were not reported to adult authorities.

- The majority experienced verbal harassment (e.g., called names or threatened): 8 in 10 based on their sexual orientation and more than 5 in 10 based on the way they expressed their gender (see Figure 2).
- Many also experienced physical harassment and physical assault: for example, 3 in 10 were physically harassed (e.g., pushed or shoved) based on their sexual orientation and 1 in 10 were physically assaulted (e.g., punched, kicked, or injured with a weapon) based on the way they expressed their gender (see Figure 2).
- Students also reported high levels of other forms of harassment at school: 89% felt deliberately excluded or “left out” by peers; 80% had mean rumors or lies told about them; 58% were sexually harassed; 49% experienced electronic harassment or “cyberbullying”; and 45% had property (e.g., car, clothing, or books) deliberately damaged and/or stolen.

Figure 2. Harassment and Assault in Georgia Schools

- 65% of students who were harassed or assaulted in school *never* reported it to school staff, and 56% *never* told a family member about the incident. Among students who did report incidents to school authorities, only 26% said that reporting resulted in effective intervention by staff.

FACT: Many LGBT students in Georgia did not have access to in-school resources and supports.

- Only 4% attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression (see Figure 3).
- Nearly all could identify at least one school staff member supportive of LGBT students, but only 43% could identify 6 or more supportive school staff (see Figure 3).
- Only 2 in 10 had a Gay-Straight Alliance or similar student club at their school (see Figure 3).
- Only 8% were taught positive representations of LGBT people, history, and events (see Figure 3).

RECOMMENDATIONS

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBT students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBT students. Findings from the *2013 National School Climate Survey* demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBT students in Georgia who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that Georgia school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBT student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in Georgia will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

ABOUT THE RESEARCH

In 2013, GLSEN conducted the eighth National School Climate Survey (NSCS), a biennial survey of the experiences of LGBT youth in U.S. secondary schools. The national sample consisted of 7,898 LGBT students from all 50 states and the District of Columbia. A total of 242 respondents were attending schools in Georgia. The majority of the Georgia sample was White/European American (62%), 14% multi-racial, 13% African American/Black, 9% Hispanic/Latino, 2% Asian/Pacific Islander, and 1% Middle Eastern/Arab American. The gender composition was 41% cisgender female, 37% cisgender male, 10% genderqueer, 8% transgender, and 3% some other gender (e.g., genderfluid). Most (92%) attended public schools. The school community makeup was 44% suburban, 43% rural/small town, and 13% urban. The results reported for Georgia have a margin of error of +/-6%.
