

## SCHOOL CLIMATE IN COLORADO

Findings from the GLSEN 2015 National School Climate Survey demonstrate that Colorado schools were not safe for most lesbian, gay, bisexual, transgender, and queer (LGBTQ) secondary school students. In addition, many LGBTQ students in Colorado did not have access to important school resources, such as having Gay-Straight Alliances or similar student clubs, and were not protected by comprehensive anti-bullying/harassment school policies.

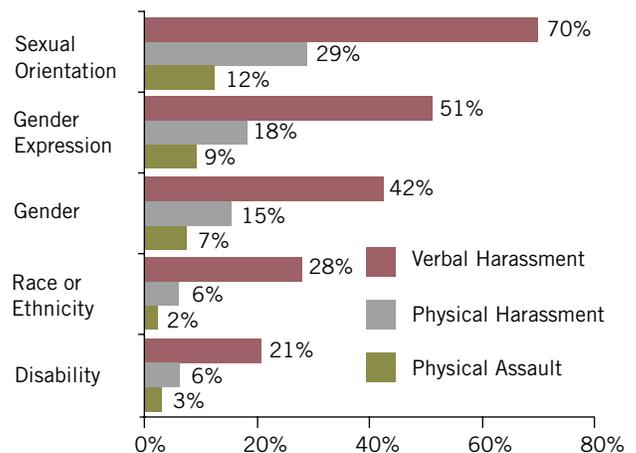

**FACT: The vast majority of LGBTQ students in Colorado regularly heard anti-LGBT remarks (Fig. 1).** Many also regularly heard school staff make homophobic remarks (13%) and negative remarks about someone's gender expression (31%).

**FACT: Most LGBTQ students in Colorado had been victimized at school (Fig. 2).** Of those, most never reported the incident to school staff (59%). Only 40% of those students who reported incidents said it resulted in effective staff intervention.

(percentage of LGBTQ students hearing remarks sometimes, often, or frequently)

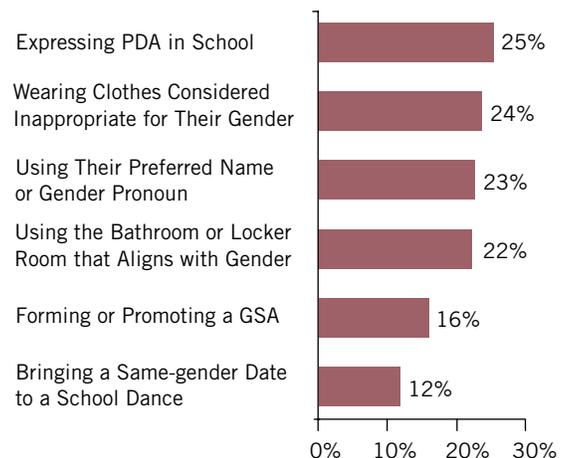

**Figure 2. Identity-based Harassment & Assault in Colorado Schools**  
(percentage of LGBTQ students harassed or assaulted)

**FACT: Many LGBTQ students in Colorado reported discriminatory policies or practices at their school (Fig. 3).** More than half (58%) experienced at least one form of discrimination at school during the past year.

- One in four LGBTQ students in Colorado schools were disciplined for public affection that does not result in similar action when it occurs between non-LGBTQ students (25%).
- In Colorado, more than 1 in 5 LGBTQ students (22%), and over half of transgender students (54%), were unable to use the school restroom that aligned with their gender. Additionally, nearly 1 in 4 LGBTQ students (23%), and nearly 3 in 4 transgender students (72%), were prevented from using their preferred name and gender pronouns in school.
- LGBTQ students experienced other forms of school discrimination (not in Fig. 3): being unable to wear LGBT-supportive apparel (14%), being unable to discuss LGBT issues in assignments (22%), being unable to include LGBT themes in extracurricular activities (e.g. school yearbook, Day of Silence) (17%), and being prevented or discouraged from playing school sports due to an LGBT identity (14%).

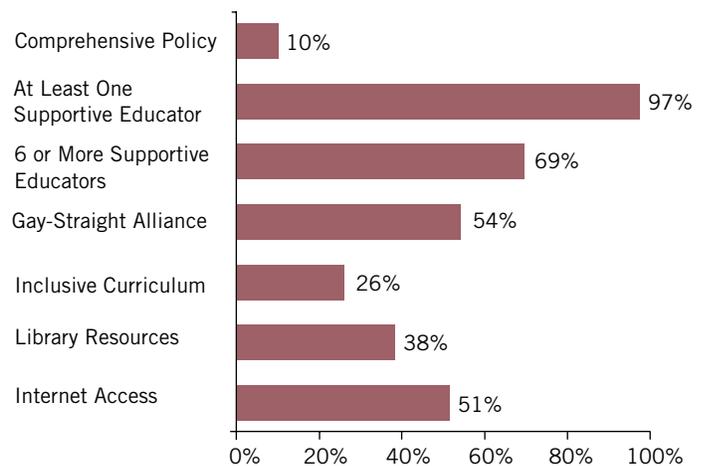

**Figure 3. Discrimination Against LGBTQ Students in Colorado Schools**  
(percentage that were prevented from...)

**FACT: Many LGBTQ students in Colorado did not have access to in-school resources and supports (Fig. 4).**

- One in ten (10%) attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression.
- The majority could identify at least one school staff member supportive of LGBTQ students, and 69% could identify 6 or more supportive school staff.
- More than half (54%) had access to a Gay-Straight Alliance or similar student club that provides a safe and affirming space and promotes a more welcoming school climate for LGBTQ students.
- Half (51%) could access information about LGBTQ communities on school Internet.

**RECOMMENDATIONS**

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBTQ students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBTQ students. Findings from the 2015 National School Climate Survey demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBTQ students in Colorado who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that Colorado school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBTQ student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in Colorado will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

**ABOUT THE RESEARCH** In 2015, GLSEN conducted the ninth National School Climate Survey (NSCS), a biennial survey of the experiences of LGBTQ youth in U.S. secondary schools. The national sample consisted of 10,528 LGBTQ students from all 50 states and the District of Columbia. A total of 223 respondents were attending schools in Colorado. The Colorado sample was majority White/European American (66%), 23% Hispanic/Latino, 5% Multiracial, 2% Black/African American, 2% Asian/South Asian/Pacific Islander, and 1% Native American. The gender composition was 34% cisgender male, 32% cisgender female, 13% transgender, 12% genderqueer, and 10% another gender (e.g., genderfluid). Most (87%) attended public schools. The school community makeup was 19% rural/small town, 39% suburban, and 43% urban. The results reported for Colorado have a margin of error of +/-6%.
