

2013 STATE SNAPSHOT

Findings from the GLSEN 2013 National School Climate Survey demonstrate that Arizona schools were not safe for most lesbian, gay, bisexual, and transgender (LGBT) secondary school students. In addition, many LGBT students in Arizona did not have access to important school resources, such as Gay-Straight Alliances, and were not protected by comprehensive anti-bullying/harassment school policies.

FACT: The vast majority of LGBT students in Arizona regularly heard anti-LGBT remarks.

- Nearly all heard “gay” used in a negative way (e.g., “that’s so gay”) and 9 in 10 heard other homophobic remarks (e.g., “fag” or “dyke”) at school regularly (i.e., sometimes, often, or frequently; see Figure 1).
- More than 8 in 10 regularly heard other students in their school make negative remarks about how someone expressed their gender, such as comments about someone not acting “feminine” or “masculine” enough (see Figure 1).
- More than half (56%) regularly heard negative remarks about transgender people (see Figure 1).
- Students also heard anti-LGBT language from school staff. 22% regularly heard staff make negative remarks about someone’s gender expression, and 15% regularly heard school staff make homophobic remarks.

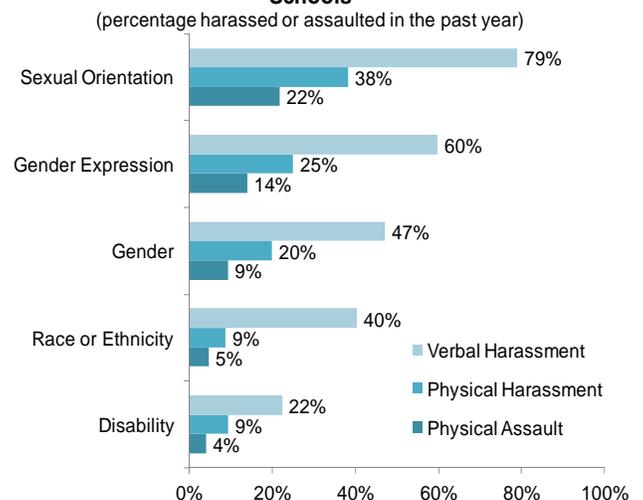

Figure 1. Hearing Anti-LGBT Remarks from Students in Arizona Schools

FACT: Most LGBT students in Arizona had been victimized at school. Many of these incidents were not reported to adult authorities.

- The majority experienced verbal harassment (e.g., called names or threatened): 8 in 10 based on their sexual orientation and 6 in 10 based on the way they expressed their gender (see Figure 2).
- Many also experienced physical harassment and physical assault: for example, nearly 4 in 10 were physically harassed (e.g., pushed or shoved) based on their sexual orientation and more than 1 in 10 were physically assaulted (e.g., punched, kicked, or injured with a weapon) based on the way they expressed their gender (see Figure 2).
- Students also reported high levels of other forms of harassment at school: 90% felt deliberately excluded or “left out” by peers; 81% had mean rumors or lies told about them; 64% were sexually harassed; 46% had property (e.g., car, clothing, or books) deliberately damaged and/or stolen; and 53% experienced electronic harassment or “cyberbullying.”

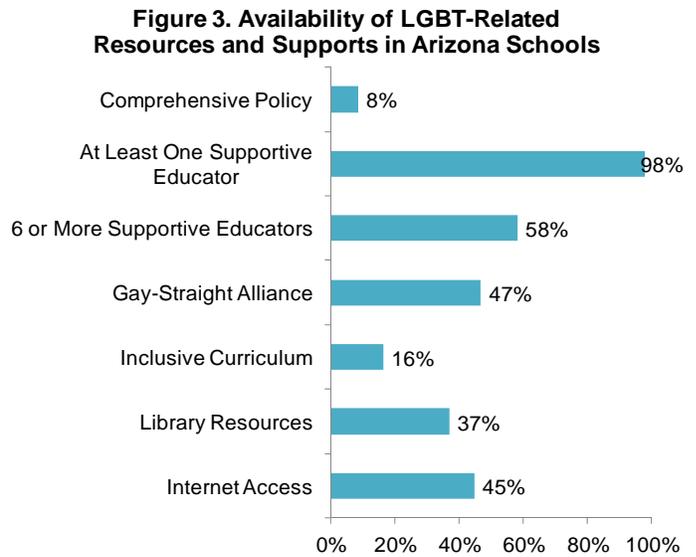

Figure 2. Harassment and Assault in Arizona Schools

- 58% of students who were harassed or assaulted in school *never* reported it to school staff, and 48% *never* told a family member about the incident. Among students who did report incidents to school authorities, only 31% said that reporting resulted in effective intervention by staff.

FACT: Many LGBT students in Arizona did not have access to in-school resources and supports.

- Only 8% attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and/or gender identity/expression (see Figure 3).
- Nearly all could identify at least one school staff member supportive of LGBT students, but only 58% could identify 6 or more supportive school staff (see Figure 3).
- Many did not have LGBT-inclusive curricular resources: only 16% were taught positive representations of LGBT people, history, and events, and only 45% could access information about LGBT communities on school Internet (see Figure 3).

RECOMMENDATIONS

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBT students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBT students. Findings from the *2013 National School Climate Survey* demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBT students in Arizona who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that Arizona school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBT student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in Arizona will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

ABOUT THE RESEARCH

In 2013, GLSEN conducted the eighth National School Climate Survey (NSCS), a biennial survey of the experiences of LGBT youth in U.S. secondary schools. The national sample consisted of 7,898 LGBT students from all 50 states and the District of Columbia. A total of 154 respondents were attending schools in Arizona. The majority of the Arizona sample was White (60%), 24% Hispanic/Latino, 10% multi-racial, 3% Native American/American Indian, 1% African American/Black, and 1% Asian/Pacific Islander. The gender composition was 42% cisgender female, 35% cisgender male, 13% transgender, 9% genderqueer, and 1% some other gender (e.g., genderfluid). Most (91%) attended public schools. The school community makeup was 52% urban, 23% rural/small town, and 25% suburban. The results reported for Arizona have a margin of error of +/-8%.
