

## 2013 STATE SNAPSHOT

Findings from the GLSEN 2013 National School Climate Survey demonstrate that Indiana schools were not safe for most lesbian, gay, bisexual, and transgender (LGBT) secondary school students. In addition, many LGBT students in Indiana did not have access to important school resources, such as having Gay-Straight Alliances or similar student clubs, and were not protected by comprehensive anti-bullying/harassment school policies.

**FACT: The vast majority of LGBT students in Indiana regularly heard anti-LGBT remarks.**

- Almost all heard “gay” used in a negative way (e.g., “that’s so gay”) and more than 9 in 10 heard other homophobic remarks (e.g., “fag” or “dyke”) at school regularly (i.e., sometimes, often, or frequently; see Figure 1).
- More than 8 in 10 regularly heard other students in their school make negative remarks about how someone expressed their gender, such as comments about someone not acting “feminine” or “masculine” enough (see Figure 1).
- Nearly 6 in 10 regularly heard negative remarks about transgender people (see Figure 1).
- Students also heard anti-LGBT language from school staff. 30% regularly heard staff make negative remarks about someone’s gender expression, and 24% regularly heard school staff make homophobic remarks.

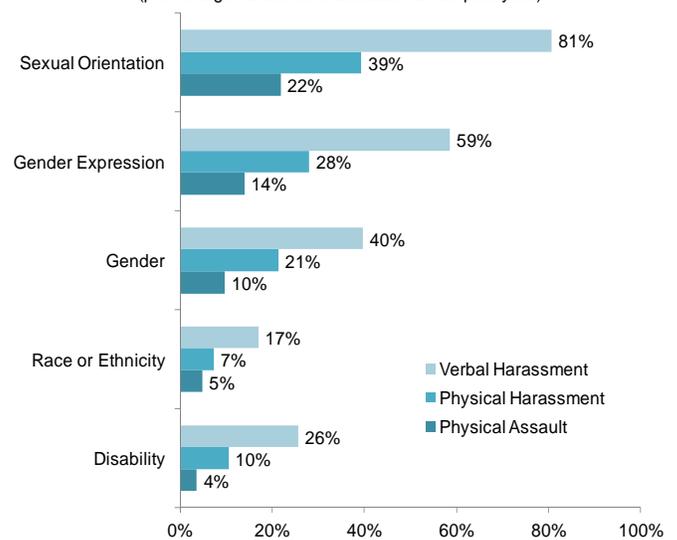

**Figure 1. Hearing Anti-LGBT Remarks from Students in Indiana Schools**

**FACT: Most LGBT students in Indiana had been victimized at school. Many of these incidents were not reported to adult authorities.**

- The majority experienced verbal harassment (e.g., called names or threatened): 8 in 10 based on their sexual orientation and 6 in 10 based on the way they expressed their gender (see Figure 2).
- Many also experienced physical harassment and physical assault: for example, 4 in 10 were physically harassed (e.g., pushed or shoved) based on their sexual orientation and more than 1 in 10 were physically assaulted (e.g., punched, kicked or injured with a weapon) based on the way they expressed their gender (see Figure 2).
- Students also reported high levels of other forms of harassment at school: 89% felt deliberately excluded or “left out” by peers; 85% had mean rumors or lies told about them; 54% were sexually harassed; 48% experienced electronic harassment or “cyberbullying”; and 44% had property (e.g., car, clothing, or books) deliberately damaged and/or stolen.

**Figure 2. Harassment and Assault in Indiana Schools**

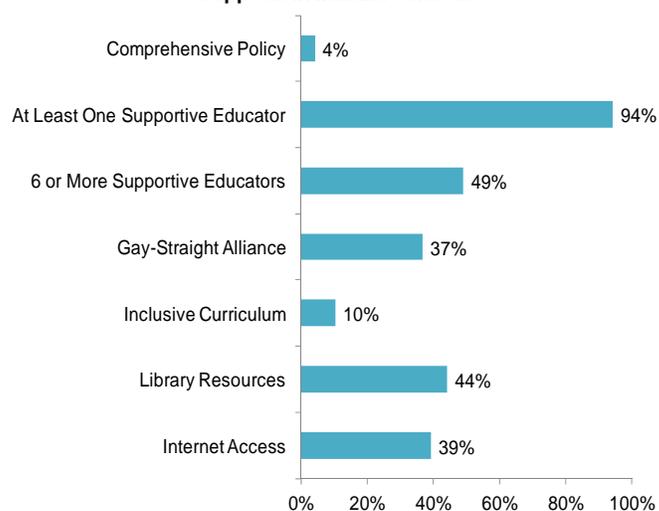

- 56% of students who were harassed or assaulted in school *never* reported it to school staff, and 53% *never* told a family member about the incident. Among students who did report incidents to school authorities, only 29% said that reporting resulted in effective intervention by staff.

**FACT: Many LGBT students in Indiana did not have access to in-school resources and supports.**

- Only 4% attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression (see Figure 3).
- Nearly all could identify at least one school staff member supportive of LGBT students, but only 49% could identify 6 or more supportive school staff (see Figure 3).
- Only 37% had a Gay-Straight Alliance or similar student club at their school (See Figure 3).
- Only 10% were taught positive representations of LGBT people, history, and events (see Figure 3).

**RECOMMENDATIONS**

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBT students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBT students. Findings from the *2013 National School Climate Survey* demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBT students in Indiana who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that Indiana school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBT student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in Indiana will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

GLSEN (the Gay, Lesbian & Straight Education Network) is the leading national education organization focused on ensuring safe schools for all students.

**ABOUT THE RESEARCH**

In 2013, GLSEN conducted the eighth National School Climate Survey (NSCS), a biennial survey of the experiences of LGBT youth in U.S. secondary schools. The national sample consisted of 7,898 LGBT students from all 50 states and the District of Columbia. A total of 165 respondents were attending schools in Indiana. The majority of the Indiana sample was White/European American (87%), 6% multi-racial, 6% Hispanic/Latino, and less than 2% Asian/Pacific Islander or Native American/American Indian. The gender composition was 38% cisgender female, 38% cisgender male, 12% transgender, 9% genderqueer, and 3% some other gender (e.g., genderfluid). Most (90%) attended public schools. The school community makeup was 42% rural/small town, 35% suburban, and 23% urban. The results reported for Indiana have a margin of error of +/-7%.
