

## 2013 STATE SNAPSHOT

Findings from the GLSEN 2013 National School Climate Survey demonstrate that North Carolina schools were not safe for most lesbian, gay, bisexual, and transgender (LGBT) secondary school students. In addition, many LGBT students in North Carolina did not have access to important school resources, such as having Gay-Straight Alliances (GSAs) or similar student clubs, and were not protected by comprehensive anti-bullying/harassment school policies.

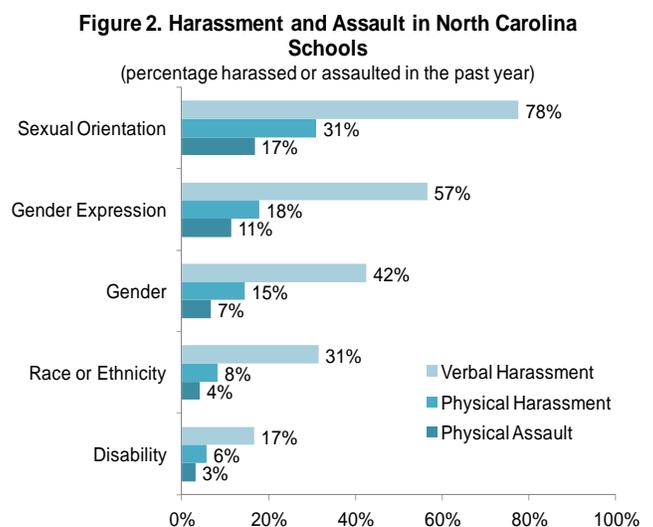

**FACT: The vast majority of LGBT students in North Carolina regularly heard anti-LGBT remarks, sexist remarks, and negative remarks about gender expression.**

- Almost all heard “gay” used in a negative way (e.g., “that’s so gay”) and nearly 9 in 10 heard other homophobic remarks (e.g., “fag” or “dyke”) at school regularly (i.e., sometimes, often, or frequently; see Figure 1).
- 8 in 10 regularly heard other students in their school make negative remarks about how someone expressed their gender, such as comments about someone not acting “feminine” or “masculine” enough (see Figure 1).
- More than 6 in 10 heard negative remarks about transgender people (see Figure 1).
- Students also heard anti-LGBT language from school staff. 29% regularly heard school staff make negative remarks about someone’s gender expression and 21% regularly heard staff make homophobic remarks.

**FACT: Most LGBT students in North Carolina had been victimized at school. The majority of these incidents were not reported to adult authorities.**

- The majority experienced verbal harassment (e.g., called names or threatened): nearly 8 in 10 based on their sexual orientation and nearly 6 in 10 based on the way they expressed their gender (see Figure 2).
- Many also experienced physical harassment and physical assault: for example, 3 in 10 were physically harassed (e.g., pushed or shoved) based on their sexual orientation and 1 in 10 was physically assaulted (e.g., punched, kicked, or injured with a weapon) based on the way they expressed their gender (see Figure 2).
- Students also reported high levels of other forms of harassment at school: 85% felt deliberately excluded or “left out” by peers; 77% had mean rumors or lies told about them; 64% were sexually harassed; 51% experienced electronic harassment or “cyberbullying”; and 47% had property (e.g., car, clothing, or books) deliberately damaged and/or stolen.

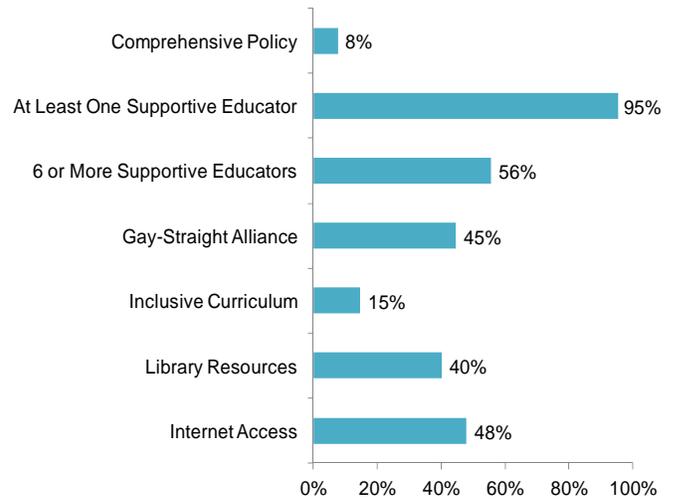

- 61% of students who were harassed or assaulted in school *never* reported it to school staff, and 58% *never* told a family member about the incident. Among students who did report incidents to school authorities, only 20% said that reporting resulted in effective intervention by staff.

**FACT: LGBT students in North Carolina most often did not have access to in-school resources and supports.**

- Only 8% attended a school with a comprehensive anti-bullying/harassment policy that included specific protections based on sexual orientation and gender identity/expression (see Figure 3).
- Nearly all could identify at least one school staff member supportive of LGBT students, but only 56% could identify 6 or more supportive school staff (see Figure 3).
- Only about 4 in 10 had a Gay-Straight Alliance or similar student club at their school and just over 1 in 10 were taught positive representations of LGBT people, history, and events (see Figure 3).

**RECOMMENDATIONS**

School-based supports such as comprehensive anti-bullying/harassment policies, school personnel who are supportive of LGBT students, Gay-Straight Alliances, and LGBT-inclusive curricular resources can positively affect school climate for LGBT students. Findings from the *2013 National School Climate Survey* demonstrate that students attending schools with these resources and supports report more positive school experiences, including lower victimization and absenteeism and higher academic achievement.

Given the high percentages of LGBT students in North Carolina who experience harassment at school and the limited access to key resources and supports that can have a positive effect on their school experiences, it is critical that North Carolina school leaders, education policymakers, and other individuals who are obligated to provide safe learning environments for all students take the following steps:

- Implement comprehensive school anti-bullying/harassment policies;
- Support Gay-Straight Alliances;
- Provide professional development for school staff on LGBT student issues; and
- Increase student access to LGBT-inclusive curricular resources.

These actions can move us toward a future in which all students in North Carolina will have the opportunity to learn and succeed in school, regardless of sexual orientation, gender identity, or gender expression.

**ABOUT THE RESEARCH**

In 2013, GLSEN conducted the eighth National School Climate Survey (NSCS), a biennial survey of the experiences of LGBT youth in U.S. secondary schools. The national sample consisted of 7,898 LGBT students from all 50 states and the District of Columbia. A total of 199 respondents were attending schools in North Carolina. The majority of the North Carolina sample was White/European American (70%), 12% Hispanic/Latino, 7% multi-racial, 4% African American/Black, 3% Asian/Pacific Islander, 2% Middle Eastern/Arab American, and 2% Native American/American Indian. The gender composition was 48% cisgender female, 31% cisgender male, 10% genderqueer, 6% some other gender (e.g., genderfluid), and 5% transgender. Most (92%) attended public schools. The school community makeup was 45% urban, 43% rural/small town, and 12% suburban. The results reported for North Carolina have a margin of error of +/-7%.
